

Proof of Work and Mining

Bitcoin History and Adoption

Bitcoin History and Adoption

How often is a new Bitcoin block found on average? A. Decentralization [B] Inflationary C. Limited supply D. Censorship resistance How often is a new Bitcoin block found on average? A. Every 1 minute [B] Every 10 minutes C. Every 30 minutes D. Every hour Proof of Work and Mining What is the purpose of the Bitcoin whitepaper? A. A marketing document [B] A technical description of Bitcoin C. A legal text D. A price prediction model

? ? **3**B **CURIOUS CURIOUS CURIOUS** Which company officially What is a Bitcoin exchange? What is a peer-to-peer network accepted Bitcoin as a payment in Bitcoin? method in 2014? A. A mining pool A. A central server [B] A platform for buying A. Facebook and selling Bitcoin [B] A network without central authority [B] Microsoft C. A wallet provider C. A mining pool C. Amazon D. A regulator D. An exchange system D. Netflix Bitcoin History and Adoption Bitcoin History and Adoption **Technology and Security** 33 30 28 **CURIOUS CURIOUS CURIOUS** What type of currency is What is a transaction fee in What is the main difference Bitcoin? Bitcoin? between Bitcoin and traditional money? A. Fiat currency A. A tax to the government A. Bitcoin is physical [B] Cryptocurrency [B] An amount miners receive for processing B. Bitcoin is centralized C. Gold-based C. A wallet subscription [C] Bitcoin is digital and D. Stock-based decentralized D. A marketing cost contribution D. Bitcoin has no value Bitcoin History and Adoption Bitcoin History and Adoption **Technology and Security** ? ? ?3 **CURIOUS CURIOUS CURIOUS** What is a block in the context What does 'To the Moon' mean Who published the Bitcoin in the Bitcoin community? of Bitcoin? whitepaper? A. A new wallet A. A physical storage A. Vitalik Buterin [B] An expression for rising B. A mining hardware [B] Satoshi Nakamoto prices

Bitcoin History and Adoption Technology and Security Bitcoin History and Adoption

[C] A record of transactions

D. A wallet

C. A mining protocol

D. A security feature

C. Hal Finney

D. Adam Back

CURIOUS 😥	CURIOUS 🙉	CURIOUS 🙉
What is the purpose of a public key? A. Signing transactions [B] Receiving Bitcoin C. Mining D. Creating wallets	What does 'permissionless' mean in Bitcoin? A. Nobody can use Bitcoin [B] Anyone can participate without permission C. Only miners can send transactions D. Only governments can use Bitcoin	What is the goal of mining in the Bitcoin network? A. Generating new wallets [B] Validating transactions and finding new blocks C. Buying Bitcoin D. Deleting hashes
Technology and Security	Technology and Security	Proof of Work and Mining
CURIOUS 🙉	CURIOUS 🙉	CURIOUS 🙉
How many Satoshis correspond to 1 Bitcoin? A. 100,000 B. 1 Million C. 10 Million [D] 100 Million	Which function does Bitcoin NOT directly fulfill? A. Means of payment B. Store of value [C] Smart contracts D. Unit of account	How many decimal places does 1 Bitcoin have? A. 6 [B] 8 C. 10 D. 12
Bitcoin History and Adoption	Technology and Security	Bitcoin History and Adoption
What is the goal of the Bitcoin community's 'Laser Eyes'? A. A security protocol [B] A meme for rising prices C. A mining tool D. A wallet type	What is a UTXO (Unspent Transaction Output)? A. A used Bitcoin [B] An output that has not yet been spent C. A mining device D. A secret key	How does Proof of Work contribute to the security of the Bitcoin blockchain? A. It encrypts wallets [B] It makes attacks like double-spending expensive C. It lowers transaction fees D. It creates new Bitcoins
Bitcoin History and Adoption	Technology and Security	Proof of Work and Mining

BITCOINER 🙉	BITCOINER 20	BITCOINER
What is a private key?	Which exchange was hacked in 2014 and lost many Bitcoins?	What is the purpose of the Lightning Network?
A. A public key	A. Coinbase	A. Bitcoin mining
B. A password for the wallet	B. Binance	[B] Faster and cheaper transactions
[C] A unique secret key that signs transactions	C. Kraken	C. Smart contracts
D. A QR code	[D] Mt. Gox	D. Data storage
Technology and Security	Bitcoin History and Adoption	Technology and Security
BITCOINER 98	BITCOINER 98	BITCOINER
How many blocks are found on average per day in the Bitcoin	What happens every 210,000 blocks in the Bitcoin network?	Who was Hal Finney?
network?	A. A hard fork	A. A Bitcoin opponent
A. 6	B. A network upgrade	[B] A developer and one of the first Bitcoin
B. 100	[C] The block reward is	recipients
[C] 144	halved (Halving) D. A blockchain reset	C. A miner from China D. A politician
D. 288		·
Proof of Work and Mining	Proof of Work and Mining	Bitcoin History and Adoption
BITCOINER 💇	BITCOINER 20	BITCOINER 99
When was the first Bitcoin block (Genesis Block) mined?	What is a seed phrase (recovery phrase)?	What role do miners play in the Bitcoin network?
A. 2008	A. A transaction code	A. They trade Bitcoin
[B] 2009	B. An encryption algorithm	B. They lend Bitcoin
C. 2010	[C] A backup for a wallet	[C] They validate and secure transactions through
D. 2011	D. A mining script	computational power
		D. They store wallets

BITCOINER 🕫	BITCOINER 🐠	BITCOINER
Which hardware is particularly efficient for Bitcoin mining? A. CPU B. GPU C. FPGA [D] ASIC	How many blocks does a transaction usually need for high security? A. 1 B. 3 [C] 6 D. 10	What is a transaction that has not yet been included in a block called? A. Pending B. Floating [C] Unconfirmed D. Ghost
Proof of Work and Mining	Technology and Security	Technology and Security
BITCOINER 😥	BITCOINER 20	BITCOINER 20
[A] A wallet kept offlineB. A wallet with low feesC. A wallet for miningD. A wallet with an integrated exchange	A. 12.5 BTC B. 6.25 BTC [C] 3.125 BTC D. 1 BTC	A. A mining algorithm [B] A structure for efficiently storing transactions C. A wallet type D. A security protocol
Technology and Security	Proof of Work and Mining	Technology and Security
What is a 'mempool' in the Bitcoin network? A. A storage for new blocks B. A pool for miners [C] A storage for unconfirmed transactions D. A wallet backup	What is the purpose of a 'time lock' in Bitcoin transactions? A. Executing transactions immediately [B] Releasing transactions at a later time C. Deleting transactions D. Locking wallets	What is a 'Replace-by-Fee' (RBF)? A. Creating a new wallet [B] Replacing a transaction with a higher fee C. A mining protocol D. A security update
Technology and Security	Technology and Security	Technology and Security

? ? ?# **BITCOINER BITCOINER BITCOINER** What is a 'fork' in the What is a 'hot wallet'? What is the purpose of a mining pool? Bitcoin blockchain? A. A wallet that is offline A. Buying Bitcoins A. A new wallet [B] A wallet that is connected online [B] Combining computational [B] A split in the power to find blocks blockchain C. A wallet for mining faster C. A mining tool D. A wallet with low fees C. Storing wallets D. A security protocol D. Trading transactions Proof of Work and Mining **Technology and Security Technology and Security** ? **3**B **BITCOINER BITCOINER** ?# **BITCOINER** What is the purpose of a What is the 'block time' in What is a 'dust limit' in 'watch-only wallet'? Bitcoin? Bitcoin? A. Only conducting mining A. The time to send a A. The minimum transaction transaction fee [B] Only displaying [B] The smallest spendable [B] The average time to find transactions without a new block amount of a UTXO signing them C. The time to create a C. The maximum block size C. Only buying Bitcoins wallet D. The minimum mining power D. Only storing blocks D. The time for a halving **Technology and Security** Proof of Work and Mining **Technology and Security** ?# **BITCOINER** ?# **BITCOINER** ?# **BITCOINER** What is the purpose of a What is the purpose of the What is a 'paper wallet'? 'difficulty adjustment'? 'block header'? [A] A wallet on paper with keys A. Lowering transaction A. Storing transactions fees B. A wallet for mining [B] Verifying the integrity [B] Keeping the block time of a block around 10 minutes C. A digital wallet C. Securing wallets C. Increasing the block D. A wallet for size transactions D. Increasing mining power D. Securing wallets Proof of Work and Mining Technology and Security **Technology and Security**

BITCOINER 😥	BITCOINER 20	BITCOINER 20
Which country adopted Bitcoin as legal tender in 2022? [A] Central African Republic B. Panama C. Cuba D. Argentina	What is the purpose of a 'hardware wallet'? A. Conducting mining [B] Secure offline storage of private keys C. Trading transactions D. Storing blocks	What is a 'nonce' in a Bitcoin block? A. A transaction code [B] A value adjusted during mining to find the hash C. A wallet backup D. A security protocol
Bitcoin History and Adoption	Technology and Security	Proof of Work and Mining
BITCOINER 💇	BITCOINER 98	SATOSHI 🕦
A. A block without transactions [B] A block not included in the main chain C. A block without a miner D. A block with invalid transactions	What is the goal of Fedimint in the Bitcoin ecosystem? A. Generating new Bitcoins [B] Enabling decentralized custody and transactions C. Introducing smart contracts D. Managing mining pools	A. Super Hash Algorithm [B] Secure Hash Algorithm C. Simple Hash Application D. Satoshi Hash Architecture
Proof of Work and Mining	Technology and Security	Technology and Security
SATOSHI 💇	SATOSHI 😕	SATOSHI 😕
A. A hacker attack on wallets B. An overload attack on the network [C] When a miner controls over 51% of the hash rate D. When half of all users sell Bitcoin	Why is Proof of Work energy-intensive? A. It uses smart contracts [B] It requires complex hash calculations C. It stores transactions D. It encrypts private keys	A. An update to increase block size [B] An update to improve privacy and scalability C. An update to introduce smart contracts D. An update to reduce mining difficulty
Technology and Security	Proof of Work and Mining	Technology and Security

SATOSHI 💴	SATOSHI 🐠	SATOSHI 🗪
What message does the Genesis Block contain? A. Satoshi is here [B] The Times 03/Jan/2009 Chancellor on brink of second bailout for banks C. Bitcoin is born D. Hello world	What is the function of difficulty in the Bitcoin network? A. It affects transaction costs B. It determines the reward per block [C] It adjusts the mining difficulty D. It decides the wallet balance	What is a soft fork? A. A complete network failure [B] A backward-compatible protocol change C. A new cryptocurrency D. A graphical interface for wallets
Bitcoin History and Adoption	Proof of Work and Mining	Technology and Security
SATOSHI 🔐	SATOSHI 🕦	SATOSHI 20
A. Python B. Rust [C] C++ D. Go	A. An update that is backward-compatible [B] A network upgrade that breaks consensus C. A new wallet D. A mining accident	A. Lightning B. Liquid [C] Taproot D. Statechains
Technology and Security	Technology and Security	Technology and Security
SATOSHI 🕫	SATOSHI 💇	SATOSHI 🕫
What happens if a miner publishes an invalid block? A. They receive a higher reward	What block size was specified in the Bitcoin whitepaper? [A] 1 MB B. 10 MB	A. A wallet with multiple currencies [B] A wallet requiring multiple signatures for transactions
B. They are permanently banned[C] The block is rejected by the networkD. The block is still stored	C. 0.5 MB D. unlimited	C. A wallet for mining D. A wallet with an integrated exchange

SATOSHI 🕬	SATOSHI 🕫	SATOSHI 👀
How is the difficulty adjusted in Bitcoin mining? A. Not at all [B] Automatically every 2016 blocks C. Daily D. After each halving	Which algorithm is used for Bitcoin mining? A. MD5 B. SHA-1 [C] SHA-256 D. Blake3	What is a 'ScriptSig' in a Bitcoin transaction? A. A mining script [B] A script to unlock a UTXO C. A wallet backup D. A security protocol
Proof of Work and Mining	Proof of Work and Mining	Technology and Security
SATOSHI 🗪	SATOSHI 👀	SATOSHI 🕦
Ilocktime' in Bitcoin? A. Executing transactions immediately [B] Releasing transactions at a specific time C. Locking blocks D. Encrypting wallets	(Simplified Payment Verification)? A. A wallet for mining [B] A wallet that only verifies block headers C. A wallet for smart contracts D. A wallet for exchanges	'CheckSequenceVerify' (CSV)? A. Confirming transactions immediately [B] Setting relative time delays for transactions C. Deleting blocks D. Securing wallets
Technology and Security	Technology and Security	Technology and Security
SATOSHI 🕬	SATOSHI 🕬	SATOSHI 🕬
What is a 'sidechain' in the Bitcoin context? [A] An alternative blockchain linked to Bitcoin B. A mining pool C. A wallet type D. A security protocol	What is the purpose of a 'Bloom Filter' in Bitcoin? A. Filtering transactions [B] Improving privacy for SPV wallets C. Finding blocks faster D. Calculating fees	What is a 'CoinJoin'? A. A mining pool [B] A method to increase privacy by mixing transactions C. A wallet type D. A security protocol
Technology and Security	Technology and Security	Technology and Security

SATOSHI 🕬	SATOSHI 🕬	SATOSHI 😕
What is a 'Tapscript' in the Taproot upgrade?	What is the purpose of a 'Hash Time Locked Contract' (HTLC)?	What is a 'Schnorr Signature' scheme?
A. A new mining protocol	A. Securing wallets	A. A mining algorithm
[B] A scripting language for more complex transactionsC. A wallet backupD. A security protocol	[B] Enabling time-bound payments in the Lightning NetworkC. Finding blocks fasterD. Deleting transactions	[B] A more efficient signature method in the Taproot upgradeC. A wallet typeD. A security protocol
Technology and Security	Technology and Security	Technology and Security
SATOSHI 😥	SATOSHI 👀	SATOSHI 👀
What is the purpose of a 'Difficulty Target' in Bitcoin? A. Validating transactions [B] Setting the difficulty level for mining a block C. Securing wallets D. Calculating fees	What is a 'Chain Reorganization' in Bitcoin? A. Creating a new wallet [B] When a longer blockchain replaces a shorter one C. A mining pool D. A security protocol	What is the purpose of an 'OP_RETURN' in Bitcoin? A. Signing transactions [B] Inserting small amounts of data into the blockchain C. Deleting blocks D. Securing wallets
Proof of Work and Mining	Proof of Work and Mining	Technology and Security
SATOSHI 👀	SATOSHI 👀	SATOSHI 🕬
What is a 'Statechain' in the Bitcoin context? A. A mining algorithm [B] A method for off-chain UTXO transfers C. A wallet type D. A security protocol	What is the purpose of a 'Child Pays for Parent' (CPFP)? A. Creating a new wallet [B] Speeding up an unconfirmed transaction with a higher fee C. Finding blocks faster D. Securing wallets	What is a 'Confidential Transaction' in the Bitcoin context? [A] A transaction with hidden amounts B. A transaction without fees C. A transaction for mining D. A transaction for wallets
Technology and Security	Technology and Security	Technology and Security

SATOSHI 👀	SATOSHI 😥	SATOSHI
What is the purpose of a 'Block Subsidy'?	What is a 'Pruned Node' in the Bitcoin network?	What is the purpose of a 'CheckLockTimeVerify' (CLTV)?
A. Storing transactions	A. A node with the full blockchain	A. Executing transactions immediately
[B] The reward for miners for finding a block	[B] A node with reduced historical data	[B] Setting absolute time delays for transactions
C. Securing wallets	C. A mining node	C. Deleting blocks
D. Calculating fees	D. A wallet node	D. Securing wallets
